

VODAFONE REFURBISHED PHONES

LEGAL TERMS AND SUBSTANTIATION

26 July 2023

Vodafone has not manufactured this device and it may not contain official OEM parts. Phones are refurbished with care by our trusted partners:

- TES AMM
- Ingram Micro
- New Way International
- Elite Mobile
- Unipart Logistics
- Tech Tigers
- PCS wireless
- Olympia

All refurbished devices have had a full diagnostic, visual check and deep clean by our partners. Each device has had a number of extensive tests performed, to ensure it is fully functional – checking the screen, battery, camera ensuring it is 100% fully functional. Cosmetic checks are performed to determine if the device is either excellent or great.

Vodafone Assured

Substantiation:

Vodafone Assured: means that all refurbished devices had a full diagnostic, visual check and deep clean by our third party refurbished suppliers. Each device has had a number of extensive tests performed, to ensure it is fully functional – checking various components of the device, such as the screen, battery, camera ensuring it is 100% fully functional. Cosmetic checks are performed to determine if the device is either excellent or great. More details on the checks on the below table. Quality of the screen		Network connection	Front camera for picture and video – quality	Fingerprint	Mute key	Audio quality
LCD white/black		Call		Magnetometer		Microphone
LCD RGB				Mother board		

Kinder to the planet

Buying a refurbished phone has a lower carbon footprint than buying a new one

Substantiation:

A lifecycle assessment study (Pamminger, R., Glaser, S. & Wimmer, W., *Modelling of different circular end-of-use scenarios for smartphones*. International Journal of Life Cycle Assessment (2021) 26:470-482) found that a refurbished phone (used for an average 1.93 years) can have a 55% lower contribution to climate change (or 'GWP') compared to a new phone (used for 2.5 years) (according to the study results shown on page 479).

Based on this study, buying and using a refurbished phone can be considered to be kinder to the planet in comparison to buying and using a new phone, because it has a lower negative impact on climate change.

For a consumer-friendly report of the study see: [Vodafone Refurbished Phones - Friendlier to the planet claim substantiation](#)
